B. Claims

The present Amendment has been prepared in accordance with a revised format established by the U.S. Patent and Trademark Office as set forth in the O.G. Notice 1267 Off. Gaz. Pat. Office 106 of February 25, 2003.

Please amend claims 1, 3 and 4 as follows. In accordance with the revised amendment format, a complete listing of all the claims appears below; this listing replaces all earlier amendments and listings of the claims.

1. (Currently Amended) A conductive liquid crystal device comprising:

a pair of oppositely disposed electrodes, and

at least two organic layers including a <u>planar</u> liquid crystalline organic layer and an organic luminescence layer disposed between the electrodes,

wherein the <u>planar</u> liquid crystalline organic layer has plural regions having which are in the same plane but have different electroconductivities, and

wherein the organic luminescence layer emits luminescences by receiving charges supplied by the plural regions of the <u>planar</u> liquid crystalline organic layer having different electroconductivities.

2. (Previously Amended) The device according to Claim 1, wherein said plural regions have different alignment states of liquid crystal molecules.

Blood

3. (Currently Amended) The device according to Claim 2, wherein said different alignment states of liquid crystal molecules have been formed by laser light irradiation of the <u>planar</u> liquid crystalline organic layer.

4. (Currently Amended) The device according to Claim 2, wherein said different alignment states of liquid crystal molecules have been formed by voltage application to the <u>planar</u> liquid crystalline organic layer.

5. (Cancelled)

6. (Cancelled)
